SUMMARY

Recent Bachelor of Science in Computer Science graduate with hands-on experience designing and developing full-stack web applications using PHP, Laravel, JavaScript, React, Node.js, and MySQL. Demonstrated ability to lead software development projects, collaborate within development teams, and build scalable systems from concept to deployment. Strong foundation in software engineering, database management, RESTful applications, and modern web technologies. Passionate about continuous learning and contributing to innovative software development teams.

EDUCATION

Western Mindanao State University

Bachelor of Science in Computer Science • 2022 – 2026

PROJECTS

Gym Management System — Lead Developer

- Led the development of a comprehensive gym membership management platform.
- Designed and implemented member registration, membership tracking, payment management, and coach scheduling modules.
- Developed a customer portal allowing members to monitor membership status and account information.
- Built an online registration website and content management system for administrative operations.
- Utilized PHP, MySQL, Bootstrap, JavaScript, HTML, and CSS to deliver a responsive web-based solution.
- Successfully completed and presented the project as part of Software Engineering coursework.

Verified: Blockchain-Based Credential Verification System — Assistant Developer

- Contributed to the development of a blockchain-powered credential verification platform.
- Implemented credential storage and verification processes using Solidity smart contracts and Polygon blockchain technology.
- Assisted in integrating OCR and AI technologies for automated credential validation.
- Supported development using React, Express.js, MySQL, Truffle, Pinata IPFS, Tesseract OCR, and Gemini AI.
- Participated in thesis development and international conference publication submission.
- Collaborated with the development team to improve system reliability and verification accuracy.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, SQL

Frontend Technologies: HTML5, CSS3, Bootstrap, React

Backend Technologies: Laravel, Node.js, Express.js

Database Management: MySQL

Tools & Platforms: Git, GitHub, XAMPP, Truffle, Polygon Blockchain, Pinata IPFS, Tesseract OCR, Gemini AI

Core Competencies: Full-Stack Development, Database Design, REST APIs, Software Engineering, Web Application Development, System Analysis and Design, Agile Development, AI-Assisted Development, Generative AI

ACHIEVEMENTS

- Passed the Civil Service Examination (Professional)
- Graduated with a Bachelor of Science in Computer Science
- Contributed to an internationally submitted research project on blockchain-based credential verification

LANGUAGES

English, Filipino (Tagalog), Cebuano
